## Program

This hands-on training includes proper use of implant torque wrenches, closed tray and open tray impression techniques, an overview of off-the-shelf and custom abutments and when to use which ones. All participants will actually fill trays and take real impressions along with practice torquing real abutments into models. We will also review functional provisionalization techniques.

## Course Learning Objectives

Participants who complete the seminar will have a better understanding of:

- Review of restorative parts and pieces
- How to take both closed tray and open tray impressions
- Cemented vs. screw-retained restorations
- Off-the-shelf abutments vs. custom abutments and when to use which ones
- All participants will have a complete hands on experience with ALL the components listed above
- Thorough patient screening and selection overview
- Soft tissue management techniques and their specific indications and contraindications will be discussed

## Course Co-Sponsored by

## Target Group

Dentists working with dental implants or interested in providing dental implant treatment. No prior dental implant training required.

## Presented by Dr. Saeid Malboubi

Dr. SAEID MALBOUBI, Periodontist, graduated from BOSTON UNIVERSITY with a Doctorate in Dental Surgery (DDS), Masters of Science (M.S) in Oral Biology and Certificate of Advanced Graduate Studies (SAGS) in Periodontics and Implant surgery and a Diplomate of American Academy of Periodontology. He also has been involved in teaching Periodontics and oral biology for two years in Boston University. Specializing in Piezosurgery® and Implant surgery, Dr Malboubi has over 15 years of experience worldwide.

## About Neoss

Our investment in science and simplicity has led to the evolution of one of the most comprehensive and sophisticated dental implant systems. Our technology stems from the relationships we share with clinicians, academics, technicians and engineers from around the world, enabling us to provide an advanced implant system with real benefits to the whole implant team. Our product range features a minimum number of components and is designed to provide simplicity of restoration, greater surgical freedom and increased versatility.
